

Case Study

Aerospace

Annual Savings Achieved

- £9,694.00
- 39 Tons Co2

Payback

- 2.3 Years

Benefits

- Reductions in energy costs
- Improved efficiency
- Removal of Reactive Power Charges

B/E Aerospace is a world leader in the manufacture of interior cabin products, fastener distribution, and logistical services for commercial, business & military jets.

The company has evolved into a \$3.5 billion industry leader with over 10,000 employees and more than 35 major facilities around the world.

PES have a long standing relationship with BE Aerospace and have introduced a number of energy saving systems over the years and applied modifications to existing systems including the introduction of EnergyAce [Power Factor Correction](#) to improve energy efficiency and reduce energy bills even further.

Payback was just over 2 years although a reduction in maintenance costs and the protection of all electrical appliances, plant and machinery will improve the real payback considerably.

For more information on how EnergyAce can benefit your organisation, contact us now on 01695 559785, post@pesgrouppltd.co.uk or visit www.energyace.co.uk
